Zusammenfassung von **JP 2001220316 (A)**

PROBLEM TO BE SOLVED: To provide a cosmetic composition giving nonsticky, favorable feeling when applied, with the aqueous phase clear in appearance and the oily phase spherically dispersed in the aqueous phase and the interface of the spherical oil droplets clear, with the oily ingredient stably dispersed in a spherical form in high reproducibility after applied. SOLUTION: This cosmetic composition comprises an aqueous phase, oily phase and powdery ingredient, with the oily phase spherically dispersed in the aqueous phase; wherein the powdery ingredient to be used is hydrophobicized silica.
